To whom it may concern:

Pierce Greene was an intern for me at CrowdPublish.TV, a website where writers and actors earn financial support from their fans to gain independence from the Harvey Weinstein culture and other predatory business models. His position was Production Assistant.

Throughout his time working with us, Pierce has done everything that I asked of him, which includes editing and filming certain parts of a short film, finding potential clients for the website, and helping to make the site more user-friendly.

I highly recommend Pierce; he is very reliable and dependable.

Sincerely,

Lisa Schaefer, Ph.D.
